Show your work!!!

1.  $10 + 4(5 - 2 \times 3) + 4$

2. Better buy 6 oranges for 2.00 or  
10 oranges for 3.50

2 step equations

$5x - 5 = 120$

$h/4 + 2 = 30$

$6k + 2 = 20$

$-k/3 + 8 = -4$

Define and provide an EXAMPLE of the following terms.

1. Discount

2. Tax

PSSA Question- Underline important info and show your work.

Romell bought a phone for \$300 but it was 30% off. Maykah bought a phone for 400 but it was 40% off. Who paid more for their phone.

On the back:

Create a word problem that involves % off and tax.
