Child/Adolescent/Adult Psychiatry Services

Our board certified psychiatrists and psychiatric nurse practitioners create an individualized treatment approach that promotes your overall psychological well-being. Our goal is to improve both your mental and physical health. Our medical providers will assess, diagnose, and prescribe medication in addition to coordinating your overall care with your clinician and primary care physician.

Primary Care Co-location

Springfield Psychological is providing high quality behavioral health services within many primary care physician practices throughout the Greater Delaware Valley area. You can now book appointments directly in one of our participating PCP locations. Visit our website for further information and specific locations. With your consent we collaborate with your primary care physician.

Patient Portal

As a state of the art provider in behavioral health services we utilize the most effective evidenced based treatment approaches, cutting edge medical interventions (Genesight Testing), and provide direct access to your electronic medical record through our patient portal.
